## Executive Summary

Rajshekhar Paul, a Class 9 student from Kolkata, embarked on a guided career discovery through the YPD Career Vision Program Lite™. His journey revealed a thoughtful, creative, and analytical mind with a strong sense of collaboration and leadership. Rajshekhar has shown a clear enjoyment in problem-solving, a growing awareness of his intellectual curiosity, and a surprising openness to both artistic and structured roles. Although undecided on a specific career path, he demonstrates strong foundations for fields involving creation, innovation, and coordination. His emotional maturity and willingness to involve his parents highlight a grounded, team-oriented mindset. Through reflection and structured exploration, Rajshekhar is now better equipped with a sense of direction, knowing which strengths to build upon and which educational paths to begin exploring.

**Step-wise** Journey

## Candidate Profile

### Student Journal Reflection

Rajshekhar shared a basic but sincere introduction of himself, including hobbies like guitar, football, and table tennis. He highlighted communication as a strength but was unsure about his career aspirations.

### What This Tells Us

He is engaged in both intellectual (Maths) and physical/creative (sports, music) activities, hinting at a balanced personality. His honesty about being unsure shows openness to guidance.

### Mentor Insight & Advice

At Class 9, it's completely okay not to know your career goal. What matters is curiosity and exploration. Rajshekhar's interests show promise in both creative and team-oriented environments. Regular self-check-ins and exposure to various subjects will help clarify direction over time.

### YPD Career Mapping

Potential paths include creative problem-solving domains like design thinking, team management, or analytical fields with collaborative roles.

## Interests & Strengths

### Student Journal Reflection

Rajshekhar acknowledged his creative and dynamic thinking, along with leadership and teamwork qualities. He felt confident in his ability to motivate others and work in group settings.

### What This Tells Us

His preferences indicate a strong inclination toward interactive, creative, and leadership-driven roles. His blend of artistic interest and logical mindset creates a unique dual strength.

### Mentor Insight & Advice

Rajshekhar should continue exploring activities where he can take initiative, organize, and innovate. Whether through school projects or hobby groups, nurturing these skills early will provide clarity and confidence in decision-making.

### YPD Career Mapping

Careers in event planning, product design, or team-based strategic roles may be areas to research.

## Values & Preferences

### Student Journal Reflection

Rajshekhar recognized his value for flexibility, quick thinking, and creativity. He noted being a creative thinker and intuitive decision-maker.

### What This Tells Us

His answers suggest a dynamic personality with a preference for open environments, fast-paced challenges, and collaborative work. He is stimulated by creativity and interaction.

### Mentor Insight & Advice

Rajshekhar should explore opportunities that combine fast execution and ideation. Whether in student-led events or brainstorming groups, he should seek environments that demand innovation under pressure.

### YPD Career Mapping

Sectors like startups, communication, digital media, or business innovation might suit his preferences.

## Value Heat

Flexibility & Freedom

Recognition & Achievement

Security & Stability

## Learning Style + Personality Assessment

### Student Journal Reflection

Rajshekhar learned he is introverted, logical, structured, and innovative. He was surprised by his introversion and creativity.

### What This Tells Us

He thrives with structure, prefers thinking things through independently, and enjoys generating new ideas. He balances logic with innovation.

### Mentor Insight & Advice

Such a personality type is excellent for strategic, research-oriented, or design careers. Rajshekhar should experiment with tasks requiring both organization and creativity.

### YPD Career Mapping

Careers like product design, UX research, or structured creative fields align well.

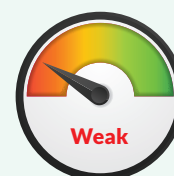

## Learning Style

Visual

Auditory

Kinesthetic

## Passion & Career Fit

### Student Journal Reflection

Rajshekhar expressed a love for intellectual stimulation. He was surprised to find creative and innovative inclinations within himself.

### What This Tells Us

His passion lies in problem-solving and understanding new ideas. He is motivated by purpose and discovery, though still exploring where it all fits.

### Mentor Insight & Advice

Encouraging Rajshekhar to continue exploring diverse subjects will help refine his interests. Exposure to innovation labs, design challenges, or STEM clubs would be beneficial.

### YPD Career Mapping

He could consider roles like inventor, analyst, educational innovator, or research assistant.

## Cognitive Thinking

– 70% +

Motivation Ladder: Motivation Level

## Cognitive Thinking

### Student Journal Reflection

Rajshekhar discovered that he can identify real-world problems and brainstorm innovative solutions when prompted. He realized problems are everywhere and that he has the potential to create helpful tools.

### What This Tells Us

He has latent problem-identification and solution-building skills. His thinking style is idea-driven, with the ability to break down complex challenges logically.

### Mentor Insight & Advice

Rajshekhar should be encouraged to join school-based innovation events and work on small projects that test real-world thinking, like creating solutions for school-related problems.

### YPD Career Mapping

Career domains like product development, entrepreneurship, and educational technology align well with this thinking pattern.

## Value Heat

Problem-Solving

Community Awareness

Innovation & Ideation

## Emotional & Social Intelligence

### Student Journal Reflection

Rajshekhar shared how he would handle a group member being late on a project. He emphasized empathy, fairness, and solution-focus over blame.

### What This Tells Us

He possesses a high degree of emotional control, collaborative spirit, and interpersonal understanding, even when under stress.

### Mentor Insight & Advice

These are leadership-ready traits. Rajshekhar should actively engage in team environments and consider roles like school monitor or club coordinator.

### YPD Career Mapping

Career sectors requiring high emotional intelligence such as human resources, client-facing consulting, or leadership in teams would suit him.

## Summary & Preliminary Career Directions

### Student Journal Reflection

Rajshekhar enjoyed creating and leading. He showed a clear tilt toward innovation and product design but acknowledged needing more exposure to career types.

### What This Tells Us

His preferences suggest an attraction to roles that mix structure with imagination, such as project leadership or product ideation.

### Mentor Insight & Advice

Encourage continued experimentation with both artistic and analytical projects. Career documentaries, fairs, and guidance sessions will expand awareness.

### YPD Career Mapping

Top potential areas: Product Design & Innovation, Project Management & Leadership.

Business Leadership

## Local Colleges + Entrance Exams

### Student Journal Reflection

Rajshekhar admitted he didn't know much about pathways but was open and eager to learn from structured help.

### What This Tells Us

He is at an excellent starting point for learning about degrees, institutions, and entrance paths in design, innovation, and leadership domains.

### Mentor Insight & Advice

Guide Rajshekhar through periodic sessions on educational pathways, like NID/NIFT for design and BBA/IPMAT for business management.

### YPD Career Mapping

Institutions to explore: NIFT, NID, IIT-IDC, St. Xavier's, and Jadavpur University.

Visual Creativity

Team Coordination

Risk Taking

## Personal Action Plan & Parent Reflection

### Student Journal Reflection

Rajshekhar felt good about taking his parents' advice and planning small steps like joining clubs and learning from career fairs.

### What This Tells Us

He is ready to take action and has accepted that exploration, not immediate clarity, is the way forward.

### Mentor Insight & Advice

Support him in building a simple but steady 3-year action plan with exploratory elements and reflection checkpoints.

### YPD Career Mapping

Focus areas for the action plan: extracurricular engagement, exposure to professionals, entry-level certifications, and maintaining a reflection journal.

Long-Term Focus

## Completion & Final Instructions

### Student Journal Reflection

Rajshekhar felt good about involving his parents in his educational journey and appreciated the structure the program provided. He gained more clarity about who he is and what types of roles might suit him.

### What This Tells Us

This reflection shows his openness to mentorship and readiness to begin shaping his future. He values guidance and structured exploration.

### Mentor Insight & Advice

As Rajshekhar completes this program, his next steps should include continuous exploration, subject-based experimentation, and engagement with guidance from parents and mentors. Keeping a monthly reflection journal and revisiting his insights annually will anchor his progress.

### YPD Career Mapping

Now equipped with stronger self-knowledge, Rajshekhar is encouraged to map his school subjects and activities against career profiles in innovation, leadership, and creative development.

## Final Reflection

Rajshekhar's journey through the YPD Career Vision Program Lite™ demonstrates not just a set of emerging strengths, but a maturing self-awareness. He consistently engaged with every step, even when unsure, and showed a deep willingness to reflect and grow. His surprise at his own innovativeness and introversion speaks volumes about the discoveries that arise from structured self-inquiry. While his career goal remains open-ended, he now has specific themes to explore: intellectual engagement, creativity, leadership, and collaborative environments. His emotional intelligence, shown through empathy and constructive thinking in group situations, further positions him for success in dynamic, people-driven careers. As he continues into higher grades, he will benefit from a mix of exploration (in clubs, workshops) and structure (goal-setting, career fairs). Most importantly, Rajshekhar is ready to take charge of his journey with curiosity and courage.

## Mentor Recommendations

### Explore Interests Hands-on

Join school clubs like art/design, debate, or leadership groups. These experiences will help him identify what he enjoys leading or creating.

### Talk to Professionals

Encourage informational chats with people in design, engineering, or business roles to get real-world insights.

### Use Vacation Time Wisely

Summer programs in coding, design thinking, or soft skills can help him develop further.

### Start a Career Journal

Monthly reflections on interests, events, or curiosities can sharpen self-awareness.

### Family Engagement

Continue parent-student conversations about future paths. Family support will anchor him through upcoming choices.

### Academic Focus

Stay strong in core subjects like Maths and Science, while exploring electives in arts or commerce when available.
